**Subject:** USF&W IA Funding CN -  
**Date:** Tuesday, September 18, 2018 11:10:28 AM

---

I am able to work on getting a CN for the USF&W IA now. Better late than never. I have gone over the requests with everyone before in meetings and with you previously. We were just waiting on DC to push the buttons so I could initiate the CN and it has taken them since March.

RPMs: If the work on these sites is no longer needed, please let me know. If the amounts are not correct, please let me know that also. I am working on memory only here.....

I will be working on the CN and hope to have it to you for review and Patti for processing no later than tomorrow. The IA itself will be processed in DC, so as long as we can get the CN to them this week, it will work out.

So far I am working on:

Tar Creek OU-5 \$25,052.46 Tar Creek Settlement Funds

Wilcox Oil Site \$10,441.36 Pipeline

Delta Shipyard \$21,313.11 Pipeline or PRP?

Donna Canal \$34,000 Removal funding

Star Canal \$10,000 PRP or Pipeline ? Kenneth, is this still needed and is it Pipeline or PRP funding?

I will supply as many of the accounting strings on the CN as I can.

Thanks,  
Kathy
